

ADDENDUM TWO

DATE: June 5, 2026

TO: PROSPECTIVE BIDDERS

FROM: **EAGLE ENGINEERING GROUP**
12100 W Center Road, Suite 803
Omaha, Nebraska 68144

RE: Water Treatment Improvements
Hastings, IA
EEG #24-27

This addendum forms a part of the Contract Documents and modifies the original Contract Documents, dated March 10, 2025, as noted below. Acknowledge receipt of this addendum in space provided on the Bid Form. FAILURE TO DO SO MAY SUBJECT BIDDER TO DISQUALIFICATION

CHANGES TO PROCUREMENT AND CONTRACTING REQUIREMENTS

1. 00 01 00 TABLE OF CONTENTS
 - A. DELETE Section 06190 Wood Trusses.
2. 00 09 00 ADDITIONAL CONDITIONS
 - A. DELETE the existing Davis Bacon Wage rates and replace with Attachment No. 1 to Addendum No. 2.

CHANGES TO PROJECT MANUAL

1. 11200 VALVES AND PIPING
 - A. ADD Attachment No. 2 to Addendum No. 2.
2. 11400 CHEMICAL FEED SYSTEMS
 - A. ADD Attachment No. 3 to Addendum No. 2.
3. 11965 ION EXCHANGE SYSTEM
 - A. AMEND Paragraph 2.02.1 and 2.02.2 to read as follows:

2.02.1 VESSEL

- .1 The vessels shall be a manufactured of reinforced fiberglass with internal polyethylene inner shell. The vessels shall have removable top and bottom flanged connections for vessel access and internals installation. The vessels shall have a molded tripod support stand and incorporate a strap system for attachment to the support platform. The vessels shall have NSF-61 certification and be ASME rated for a maximum working pressure of 130 psi and a pressure safety factor of 4:1. Painting of vessels is not required.
- .2 The vessels shall be mounted via a stainless-steel strap and support frame system, as shown on the drawings. The skid will be constructed of epoxy coated, carbon steel.

2.02.2 VESSEL INTERIOR CONSTRUCTION

- .1 Raw Water Distributor/Backwash Collection System
 - (a) The vessel shall be equipped with a raw water distribution/backwash waste collection system consisting of an ABS diffusers with basket screens for resin retention. The distributor screen shall be removable and shall be able to be installed through the top flanged connection.
- .2 Underdrain System
 - (b) The underdrain shall consist of an ABS hub and lateral effluent/backwash distributor system. The hub and lateral system shall be capable of being installed through the bottom flanged connection and shall be screened to retain the ion exchange resin.”

CHANGES TO DRAWINGS

1. SHEET 7 BUILDING SECTIONS AND DETAILS

A. ADD the following note:

- i. “HSS Header shall meet ASTM 1085 for Hollow Structural Sections and have the following characteristics and meet the below table:
 - Cold formed and welded
 - Yield stress round – 50 ksi min, 70 ksi max
 - Tensile street 65 ksi min

WELDERS - Receive rate prescribed for craft performing operation to which welding is incidental.

=====
Note: Executive Order (EO) 13706, Establishing Paid Sick Leave for Federal Contractors applies to all contracts subject to the Davis-Bacon Act for which the contract is awarded (and any solicitation was issued) on or after January 1, 2017. If this contract is covered by the EO, the contractor must provide employees with 1 hour of paid sick leave for every 30 hours they work, up to 56 hours of paid sick leave each year. Employees must be permitted to use paid sick leave for their own illness, injury or other health-related needs, including preventive care; to assist a family member (or person who is like family to the employee) who is ill, injured, or has other health-related needs, including preventive care; or for reasons resulting from, or to assist a family member (or person who is like family to the employee) who is a victim of, domestic violence, sexual assault, or stalking. Additional information on contractor requirements and worker protections under the EO is available at <https://www.dol.gov/agencies/whd/government-contracts>.

Note: Executive Order 13658 generally applies to contracts subject to the Davis-Bacon Act that were awarded on or between January 1, 2015 and January 29, 2022, and that have not been renewed or extended on or after January 30, 2022. Executive Order 13658 does not apply to contracts subject only to the Davis-Bacon Related Acts regardless of when they were awarded. If a contract is subject to Executive Order 13658, the contractor must pay all covered workers at least \$13.65 per hour (or the applicable wage rate listed on this wage determination, if it is higher) for all hours spent performing on the contract from May 11, 2026, through December 31, 2026. The applicable Executive Order minimum wage rate will be adjusted annually. Additional information on contractor requirements and worker protections under Executive Order 13658 is available at www.dol.gov/whd/govcontracts.

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (iii)).

The body of each wage determination lists the classifications and wage rates that have been found to be prevailing for the type(s) of construction and geographic area covered by the wage determination. The classifications are listed in alphabetical order under rate identifiers indicating whether the particular rate is a union rate (current union negotiated rate), a survey rate, a weighted union average rate, a state adopted rate, or a supplemental classification rate.

Union Rate Identifiers

A four-letter identifier beginning with characters other than **U**, **UAVG**, **SA**, or **SC** denotes that a union rate was prevailing for that classification in the survey. Example: PLUM0198-005 07/01/2024. PLUM is an identifier of the union whose collectively bargained rate prevailed in the survey for this classification, which in this example would be Plumbers.

0198 indicates the local union number or district council number where applicable, i.e., Plumbers Local 0198. The next number, 005 in the example, is an internal number used in processing the wage determination. The date, 07/01/2024 in the example, is the effective date of the most current negotiated rate.

Union prevailing wage rates are updated to reflect all changes over time that are reported to WHD in the rates in the collective bargaining agreement (CBA) governing the classification.

Union Average Rate Identifiers

The UAVG identifier indicates that no single rate prevailed for those classifications, but that 100% of the data reported for the classifications reflected union rates. EXAMPLE:

UAVG-OH-0010 01/01/2024. UAVG indicates that the rate is a weighted union average rate. OH indicates the State of Ohio. The next number, 0010 in the example, is an internal number used in producing the wage determination. The date, 01/01/2024 in the example, indicates the date the wage determination was updated to reflect the most current union average rate.

A UAVG rate will be updated once a year, usually in January, to reflect a weighted average of the current rates in the collective bargaining agreements on which the rate is based.

Survey Rate Identifiers

The **◆SU◆** identifier indicates that either a single non-union rate prevailed (as defined in 29 CFR 1.2) for this classification in the survey or that the rate was derived by computing a weighted average rate based on all the rates reported in the survey for that classification. As a weighted average rate includes all rates reported in the survey, it may include both union and non-union rates. Example: SUFL2022-007 6/27/2024. SU indicates the rate is a single non-union prevailing rate or a weighted average of survey data for that classification. FL indicates the State of Florida. 2022 is the year of the survey on which these classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. The date, 6/27/2024 in the example, indicates the survey completion date for the classifications and rates under that identifier.

◆SU◆ wage rates typically remain in effect until a new survey is conducted. However, the Wage and Hour Division (WHD) has the discretion to update such rates under 29 CFR 1.6(c)(1).

State Adopted Rate Identifiers

The **◆SA◆** identifier indicates that the classifications and prevailing wage rates set by a state (or local) government were adopted under 29 C.F.R 1.3(g)-(h). Example: SAME2023-007 01/03/2024. SA reflects that the rates are state adopted. ME refers to the State of Maine. 2023 is the year during which the state completed the survey on which the listed classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. The date, 01/03/2024 in the example, reflects the date on which the classifications and rates under the **◆SA◆** identifier took effect under state law in the state from which the rates were adopted.

WAGE DETERMINATION APPEALS PROCESS

1) Has there been an initial decision in the matter? This can be:

- a) a survey underlying a wage determination
- b) an existing published wage determination
- c) an initial WHD letter setting forth a position on a wage determination matter
- d) an initial conformance (additional classification and rate) determination

On survey related matters, initial contact, including requests for summaries of surveys, should be directed to the WHD Branch of Wage Surveys. Requests can be submitted via email to davisbaconinfo@dol.gov or by mail to:

Branch of Wage Surveys
Wage and Hour Division
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

Regarding any other wage determination matter such as conformance decisions, requests for initial decisions should be directed to the WHD Branch of Construction Wage Determinations. Requests can be submitted via email to BCWD-Office@dol.gov or by mail to:

Branch of Construction Wage Determinations
Wage and Hour Division
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

2) If an initial decision has been issued, then any interested party (those affected by the action) that disagrees with the decision can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Requests for review and reconsideration can be submitted via email to dba.reconsideration@dol.gov or by mail to:

Wage and Hour Administrator
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210.

=====

END OF GENERAL DECISION

..

SECTION 11200
VALVES, AND PIPING

1.0 GENERAL

1.01 DESCRIPTION

1.01.1 THE WORK covered by this section shall consist of furnishing all labor, materials, equipment, and services required to install the valves, meter, piping, and all other equipment and appurtenances as shown on the Drawings and specified herein.

1.01.2 RELATED WORK SPECIFIED ELSEWHERE:

Water Mains and Appurtenances

Section 02600

1.02 SUBMITTALS

1.02.1 SUBMIT SHOP DRAWINGS to the Engineer. Submittals shall include, but are not limited to, the following:

Gate Valve
Piping, Fittings, & Specials
Pressure Gauge
Pipe Support

1.02.2 DATA TO BE SUBMITTED WITH BID. Each Bid must be accompanied with characteristic curves and a complete description of the pump proposed to be furnished. The efficiency of the pump offered and construction details may be a factor in making a decision as to the pump to be used on this project.

2.0 PRODUCTS

2.01 GATE VALVES

2.01.1 GATE VALVES shall conform to the requirements of AWWA Standard C 500 and shall be iron body, bronze mounted disk, parallel seat type with non-rising stem. Valves shall be equipped with flanged joint ends for interior installation and with mechanical joint ends for exterior or underground installations. Valves shall be able to withstand working pressures and test pressures of 200 psi and 400 psi respectively.

Attachment No. 2 to
Addendum No. 2

2.02 CHECK VALVES

2.02.1 CHECK VALVES shall conform to the requirements of AWWA Standard C508 and shall be iron body, bronze mounted swing check valves, for normal horizontal installation. Valves shall have flanged joint ends. Valves shall be able to withstand working pressures of 175 psi.

2.03 PIPING, FITTINGS, AND SPECIALS

2.03.1 PIPING, FITTINGS, AND SPECIALS shall be ductile iron pipe, Class 51. All interior station piping, fittings and specials shall be equipped with flanged ends. All exterior or buried piping, fittings, and specials shall be equipped with mechanical joint ends.

2.04 PRESSURE GAUGES

2.04.1 PRESSURE GAUGES shall have a dial diameter of 4" minimum and ¼" gage connection. Pressure gauge shall be calibrated in pounds per square inch (psi) with a 1 to 200 psi (min.) pressure range. Pressure gauge shall be 316 stainless steel.

2.04.2 PRESSURE GAUGE shall be Ashcroft Type 1008A 4" lower connected or equal.

2.04.3 EACH GAUGE shall be equipped with a shutoff cock.

2.05 PIPE SUPPORTS

2.05.1 PIPE SUPPORTS shall be adjustable in height and capable of supporting the interior pump station piping above floor. Supports shall be steel, 2-1/2 inches in diameter.

3.0 EXECUTION

3.01 VALVES AND EQUIPMENT

3.01.1 INSTALL VALVES AND SPECIAL EQUIPMENT in accordance with, and under the supervision of, the manufacturer's representative.

END OF SECTION

SECTION 11400

CHEMICAL FEED SYSTEMS

1.0 GENERAL

1.01 DESCRIPTION

1.01.1 THE WORK COVERED UNDER THIS SPECIFICATION shall consist of the installation of chemical feed components for the existing chemicals being used within the facility. These chemicals include sodium hypochlorite (NaOCl) and phosphates. The work will include installation of scale with secondary containment, mounting of metering pumps, and reinstallation of chemical injection taps.

2.0 PRODUCTS

2.01 WEIGHING SCALES

- .1 Manufacturers:
- .2 Force Flow Equipment
- .3 Or equal
- .4 Accuracy: $\pm 0.1\%$.
- .5 Provide digital readout with NEMA 4X enclosure and 4-20mA output to SCADA for continuous, real-time monitoring and daily totalizer of chemical usage. Flexible cable shall be provided to connect load cell to indicator, provide standard 10' cable length.
- .6 Weighing scales shall be factory calibrated.
- .7 Weighing scale shall be resistant to corrosion resulting from exposure of liquid or gaseous forms of the chemicals they will be used with.
- .8 Weighing scales shall be appropriately sized for size and capacity of tank.
- .9 Chlorine: Scale Solo G2, Model: 30DR10LP
- .10 Phosphate: Scale Solo G2; Carboy Scale PVC400

Attachment No. 3 to
Addendum No. 2

2.02 SOLUTION PIPING

2.02.1 SOLUTION PIPING shall be polyethylene tubing.

2.03 MOUNTING SHELF

2.03.1 MOUNTING SHELF shall consist of a shelf bracket mounted on the wall adjacent to the 3 metering pumps. Shelf bracket shall be rigid and constructed of rugged, polyurethane coated cast iron. All hardware shall be provided for mounting to a concrete wall.

2.04 INJECTOR ASSEMBLY

2.04.1 INJECTOR ASSEMBLY shall consist of corporation stops, ball valves, check valves, and piping. Equipment shall be provided by Griffco, Model CSP-050-P.

2.05 SPARE PARTS

2.05.1 SPARE PARTS shall consist of a Spare Parts Kit.

2.06 VENT PIPING

2.06.1 VENT PIPING shall be ½" Schedule 80 PVC.

3.0 EXECUTION

3.01 INSTALLATION

3.01.1 INSTALLATION of all equipment shall be in accordance with the manufacturer's recommendations, and in accordance with "Ten State Standards." The Contractor shall install all equipment to form a complete and reliable system regardless of the amount of mechanical and electrical work or materials required.
